For over a decade, I've led teams to achieve tangible results that have demonstrably driven business growth. My passion lies in bridging the business-tech gap through strong data quality management and clear communication. I develop innovative data science solutions that unlock new opportunities and hidden value within data. Skilled in fostering a culture of innovation, I'm eager to take the lead in implementing cutting-edge data solutions, creating significant value for dynamic enterprises

STRENGHS

- **Strategic Analyst**
  Untangles complexity for actionable insights
- **Technical Communicator**
  Articulating intricate concepts into accessible information
- **Impactful Problem Solver**
  Delivers results through data-driven solutions
- **Collaborative Leader**
  Empowers teams to innovate & achieve goals

CORE COMPETENCIES

- **Technical Skills**
  - Data Science
  - Data Engineering
  - Data Visualization
  - GeoMarketing
- **Project Management**
  - Agile Methodologies
  - ERP & CRM Systems
  - Business Process Improvement
- **Programming**
  - Python
  - SQL
  - Javascript

EDUCATION

- M.Sc. in Geography
  Laval University, Canada
- B.Sc. in Geography
  Laval University, Canada
- SSVD Mechanics

LANGUAGES

French - English - Spanish

EXPERIENCE

Lead Data Analytics & Engineering | Jio Health, Vietnam — 2022-2024

- Headed a multidisciplinary team of 50 professionals, leading data-driven projects and addressing data and operations challenges, under the direction of the CTO
- Drove cross-functional projects optimizing data and business operations, and designed dashboards to enable data-driven decisions, resulting in 2x growth across core business activities
- Integrated Pentaho ETL and Redshift data mart for seamless data flow from operational inquiries to stakeholder reporting, enhancing workflow efficiency
- Successfully migrated legacy ERPs to Odoo, optimizing business performance and inventory management, leading to a 25% improvement in inventory strategy
- Replaced outdated technologies to automate in Python-built solutions, reducing manual workload by 80% and driving sales growth through streamlined operations

Analytics Engineer | POC Pharma, Vietnam — 2019-2021

- Spearheaded development of SaaS data infrastructure under CEO's leadership, building robust systems to maintain data integrity and facilitate advanced analytics
- Established data governance frameworks and scaled ETL SSIS for 20K users, 60 suppliers, and 10K products to drive sales growth and streamline operations
- Developed KPI dashboards and implemented geo-marketing activities to support data-driven decision-making
- Directed DevOps execution, automating on-time delivery, realigning team priorities, increasing inter-team productivity by 50% with automated follow-up
- Designed data quality warehouse & frameworks and automated validation processes, reducing data inconsistencies by 80% to support data science activities

Data Science Consultant | Sanisphere, Hong Kong — 2018-2019

- Delivered strategic insights from data science initiatives for Asia-Pacific multinationals, enabling an increase in market share
- Improved operational efficiency across 20 countries, helping 50+ pharmaceutical leaders achieve success through data-driven process and technology solutions
- Conducted technical training sessions to develop data analytics proficiency of clients and internal staff, fostering continuous skill development and expertise enhancement
- Implemented data governance policies and procedures, resulting in a 20% improvement in data accuracy and a 15% reduction in data security incidents

Tech & Educator | Humanis, Canada & C.I. de Monterrey, Mexico — 2016-2017

- Utilized technology to enrich curriculum delivery, facilitating interactive learning experiences in Social Humanities, Geography, and technology
- Delivered specialized classes in Geographic Information Systems (GIS), Digital Elevation Models (DEMs), and Spatial Databases

Research Assistant (M.sc. Thesis) | Laval University, Canada — 2014-2016

- Pioneered geospatial customer analysis to derive actionable marketing insights, informing strategic location selection and campaign strategies.
- Leveraged advanced Geospatial Customer Segmentation using demographic, psychographic, geographic, and behavioral data for targeted marketing initiatives
