Professional Summary

Strategic Analytics and Engineering Leader with over 10 years of experience in designing and deploying enterprise-scale data solutions that drive measurable impact and organizational transformation. Proven expertise in enhancing data quality and doubling operational efficiency through comprehensive data governance frameworks and advanced data architectures. A collaborative leader committed to building cohesive, results-driven teams and bridging technical and business domains to deliver scalable, high-impact solutions that enhance organizational value.

Core Competencies

Leadership & Key Achievements

- **Leadership & Project Management:** Collaborated with 50+ professionals, reducing healthcare project timelines by 30%
- **Technical Communicator:** Bridged technical and business teams by translating complex data concepts into actionable insights, ensuring alignment across departments
- **Innovation & Problem Solving:** Created scalable solutions, driving a 50% rise in productivity and enhancing reliability
- **Process Optimization:** Boosted operational efficiency by 60% through automation, streamlining processes, and reducing manual tasks

Technical Skills

- **Data Science & Visualization:** Power BI, Excel, Metabase, Python libraries, geospatial analytics
- **Data Engineering:** Python, SQL, ETL pipelines
- **Cloud Infrastructure:** AWS, Hetzner, Azure
- **Data Warehousing:** Redshift, PostgreSQL
- **Data Governance:** Frameworks and standards for data quality
- **Version Control & CI/CD:** Git, GitHub Actions
- **Hyperautomation:** Effective solutions to streamline processes

Work Experience

CONSULTING EXPERT & CYBERSECURITY – IPSIP & Independent, Vietnam, Ho Chi Minh City March 2024 -
Independent consultant specializing in data governance, geomatics/LiDAR analysis, and enterprise security solutions

- Assist users system troubleshooting related to Wallix Bastion & Access Manager Cybersecutiry Software
- Orchestrated geospatial projects, utilizing advanced LiDAR technology for precise topographic mapping, facility mapping, and asset management, ensuring high-quality deliverable
- Advised clients on data governance frameworks, to improved data accuracy and security compliance across operation

LEAD DATA ENGINEERING & ANALYTICS – Jio Health, Vietnam Jan 2022 - Feb 2024
Healthcare startup providing smart clinics, telemedicine, and home visits, serving over 300,000 patients and 10,000+ pharmacies with a team of 500+ professionals

- Coordinated a multidisciplinary team of 50+ professionals, delivering data-driven projects under the guidance of the CTO, improving project delivery timelines by 30%
- Automated core business processes with Python, reducing manual workload by 80% and increasing operational efficiency by 60%
- Spearheaded the migration to the Odoo ERP system, enhancing data quality by 50% and streamlining business process management.
- Architected and implemented enterprise-wide ETL processes and data warehouse architecture, enabling the company to support 3x growth in user base while maintaining data integrity

ANALYTICS ENGINEER | POC Pharma, Vietnam Nov 2019 - Sep 2021
Pharmaceutical SaaS startup serving 22 countries across Southeast Asia and Africa, partnering with 60+ multinational pharmaceutical companies Designed foundational data models, optimizing schemas for 20K users, 60 suppliers, and 10K products

- Designed foundational data models for 20K users, 60 suppliers, and 10K products, resulting in more accurate data reports and faster business insights.
- Developed KPI dashboards with Power BI, supporting data-driven decisions that resulted in a 15% increase in sales over 12 months.

- Led the DevOps transformation, increasing inter-team productivity by 50% through streamlined deployment processes and enhanced collaboration.
- Implemented automated data validation frameworks, reducing data inconsistencies by 80%, significantly improving data reliability

DATA SCIENCE CONSULTANT | Sanisphere, Hong Kong Jan 2018 - Nov 2019
Pharmaceutical market research firm serving in Southeast Asia and Africa, providing data-driven insights for pharmaceutical companies in emerging markets

- Delivered strategic data science initiatives, resulting in a 25% increase in client market share through targeted analysis and business insights.
- Managed the design and execution of metrics reports, providing actionable insights for marketing strategies and product development.
- Integrated data from Meta, Google Analytics, and other platforms to enhance marketing strategies and increase client engagement
- Implemented data governance policies, improving data accuracy by 50% and reducing operational inefficiencies across data systems

TECH & EDUCATOR| Humanis, Canada & C.I. de Mexico Jun 2015 - Jul 2017
Delivered interactive learning experiences in Social Humanities and Geography, incorporating GIS and spatial database knowledge

- Facilitated classes on Geographic Information Systems (GIS) and Digital Elevation Models (DEMs)
- Developed course content with tools like ArcGIS, QGIS, enriching the academic curriculum with practical geospatial skills

RESEARCH ASSISTANT (M.SC. THESIS)| Laval University, Canada Sep 2014 - Aug 2016
Research Chair of Attractiveness and Innovation in Tourism, analyzing geographic markets and customer behaviors

- Produced market intelligence reports for managers at the Society of Outdoor Recreation Establishments of Quebec, directly influencing strategic decision-making.

Education

M.SC. IN GEOGRAPHY– Laval University, Canada 2014 - 2015
Geomarketing & Geographic Information Science

B.SC. IN GEOGRAPHY– Laval University, Canada 2010 - 2013
Geographic Information Science

SSVD MECHANICS – College Aviron, Canada 2008 - 2009
Automobile Mechanics

Project

Enterprise Data Science Lab Implementation - The K.B. *Led end-to-end development of an enterprise data science platform optimizing AI operations and analytics delivery*

- **High-Performance Infrastructure:** Designed scalable platforms with Proxmox VE and VMware ESXi to streamline data workflows and ensure failover.
- **Modern Data Stack:** Built distributed computing with Hadoop, Spark, and Kafka for real-time analytics; set up collaborative workspaces with JupyterHub and Anaconda.
- **Automated Analytics:** Created AI-driven CRM dashboards, reducing manual reporting by 50% and boosting client tracking accuracy by 30% through ML-powered KPI monitoring.
- **Advanced AI:** Deployed custom LLMs, open-source ML pipelines, and MLOps for model versioning and monitoring
