Website: www.simonrenauld.io linkedin/simonrenauld

A passionate and innovative educator with experience in designing and delivering interactive courses across diverse subjects, including Social Humanities, Geography, GIS, Digital Terrain Modeling, and English Language. Skilled in creating engaging curriculum, leveraging cutting-edge technologies, and implementing student-centric teaching methodologies to foster critical thinking and practical application of knowledge. Additionally, possess a strong background in data analytics, engineering, and project management, enabling a unique ability to bridge technology and education.

STRENGHS

- **Strategic Analyst**
  Untangles complexity for actionable insights
- **Technical Communicator**
  Articulating intricate concepts into accessible information
- **Impactful Problem Solver**
  Delivers results through data-driven solutions
- **Collaborative Leader**
  Empowers teams to innovate & achieve goals

CORE COMPETENCIES

- **Technical Skills**
  - Data Science
  - Data Engineering
  - Data Visualization
  - GeoMarketing
- **Project Management**
  - Agile Methodologies
  - ERP & CRM Systems
  - Business Process Improvement
- **Programming**
  - Python
  - SQL
  - Javascript

EDUCATION

- **M.Sc. in Geography**
  Laval University, Canada
- **B.Sc. in Geography**
  Laval University, Canada
- **SSVD Mechanics**
  College Aviron, Canada

LANGUAGES

French - English - Spanish

TEACHING EXPERIENCE

Teaching Professional | Colegio Inglés, Mexico — 2016-2017

- Taught daily classes in Social Humanities, Geography, and General English to students of varying ages and skill levels
- Developed interactive classroom activities and assessments to encourage participation and track student progress
- Fostered a collaborative and inclusive learning environment, adapting teaching styles to accommodate diverse learners

Geomatics Instructor | Humanis Cégep de Chicoutimi, Canada — 2015-2016

- Designed and instructed courses on spatial analysis theory and applications using ArcGIS, QGIS, and spatial databases
- Utilized innovative teaching methods tailored to a diverse student body, incorporating hands-on exercises, real-world case studies, and personalized coaching
- Developed cutting-edge course materials integrating the latest software and technical components in GIS and Digital Terrain Modeling
- Guided students in 3D data acquisition (LiDAR) and spatial data visualization projects, nurturing their problem-solving abilities

Research & Teaching Assistant| Laval University, Canada — 2014-2016

- Assisted in teaching “Quantitative Geography” and “Computer-assisted Mapping” courses, providing support and guidance to students
- Conducted research for M.Sc. thesis in Geography, contributing to the advancement of knowledge in the field

PROFESSIONAL EXPERIENCE

Lead Data Analytics & Engineering | Jio Health, Vietnam — 2022-2024

- Headed a multidisciplinary team of 50 professionals, leading data-driven projects and addressing data and operations challenges
- Drove cross-functional projects optimizing data and business operations, and designed dashboards for data-driven decision-making

Analytics Engineer | POC Pharma, Vietnam — 2019-2021

- Spearheaded development of SaaS data infrastructure, building robust systems to maintain data integrity and facilitate advanced analytics
- Directed DevOps execution, automating on-time delivery, realigning team priorities, and increasing inter-team productivity by 50%

Data Science Consultant | Sanisphere, Hong Kong — 2018-2019

- Delivered strategic insights from data science initiatives for Asia-Pacific multinationals, enabling an increase in market share
- Improved operational efficiency across 20 countries, helping pharmaceutical leaders achieve success through data-driven solutions
