I am an accomplished data expert and educator eager to take on a long-term, part-time role teaching French classes. Adept at leading data-driven innovation and facilitating interactive learning, I have spearheaded multidisciplinary data project teams, designed automated solutions for strategic decision-making, and taught specialized courses in language arts, social humanities, geography, and spatial analytics. I optimize operations through cross-functional process improvements and workflow streamlining. My multifaceted background bridges business and technology needs through collaboration, clear communication, and innovative solutions.

STRENGHS

- **Strategic Analyst**
  Untangles complexity for actionable insights
- **Technical Communicator**
  Articulating intricate concepts into accessible information
- **Impactful Problem Solver**
  Delivers results through data-driven solutions
- **Collaborative Leader**
  Empowers teams to innovate & achieve goals

CORE COMPETENCIES

- **Technical Skills**
  - Data Science
  - Data Engineering
  - Data Visualization
  - GeoMarketing
- **Project Management**
  - Agile Methodologies
  - ERP & CRM Systems
  - Business Process Improvement
- **Programming**
  - Python
  - SQL
  - Javascript

EDUCATION

- M.Sc. in Geography
  Laval University, Canada
- B.Sc. in Geography
  Laval University, Canada
- SSVD Mechanics

LANGUAGES

French - English - Spanish

EXPERIENCE

Lead Data Analytics & Engineering | Jio Health, Vietnam — 2022-2024

- Headed a multidisciplinary team of 50 professionals, leading data-driven projects and addressing data and operations challenges, under the direction of the CTO
- Drove cross-functional projects optimizing data and business operations, and designed dashboards to enable data-driven decisions, resulting in 2x growth across core business activities

Analytics Engineer | POC Pharma, Vietnam

- Spearheaded development of SaaS data infrastructure under CEO's leadership, building robust systems to maintain data integrity and facilitate advanced analytics
- Directed DevOps execution, automating on-time delivery, realigning team priorities, increasing inter-team productivity by 50% with automated follow-up

Data Science Consultant | Sanisphere, Hong Kong — 2019-2021

- Delivered strategic insights from data science initiatives for Asia-Pacific multinationals, enabling an increase in market share
- Improved operational efficiency across 20 countries, helping 50+ pharmaceutical leaders achieve success through data-driven process and technology solutions

Teaching Professional | COLEGIO INGLÉS, Monterrey, Mexico

- Taught daily classes in Social Humanities and Geography
- Developed classroom activities that encouraged participation
- Draft exam and test papers, conduct class tests, supervise term end exams, evaluate test papers, and provide grades and feedback to students
- Taught courses in general English

Geomatics Teacher| Humanis Cégep de Chicoutimi, Canada — 2018-2019

- Designed and instructed courses on spatial analysis theory and applications using ArcGIS, QGIS, and spatial databases Geographic Information Systems (GIS) and Digital Terrain Modeling (DTM), covering vector/matrix analysis, data digitization, network analysis, and DEM generation/analysis.
- Taught specialized classes in Geographic Information Systems (GIS) and Digital Terrain Modeling (DTM), covering vector/matrix analysis, data digitization, network analysis, and DEM generation/analysis.
- Utilized innovative teaching methods tailored to accommodate a diverse student body with varying ages and skill levels.

2016-2017

- Developed cutting-edge course materials integrating the latest software and technical components.
- Provided hands-on exercises and projects for practical experience in GIS applications, 3D data acquisition (LiDAR), and spatial data visualization.
- Offered personalized one-on-one coaching and guidance to nurture students' potential and enhance their career readiness, while fostering critical thinking and problem-solving abilities through interactive classroom discussions and real-world case studies.

2014-2016

Research Assistant (M.sc. Thesis) | Laval University, Canada

- Assist in teaching "Quantitative Geography" and "Computer-assisted Mapping" courses.
